Two Finger Pick up System

Not available in other auto punches in this price range. The layers of paper are picked up gently, even when punching mixed paper stocks and heavy weight papers. An optional adjustable air blower is also available.

Turn-over Drum

After punching, the sheets are rotated around a large drum to maintain the correct page sequence at the output station.

QSA Punch Dies

QSA means Quick Size Adjustment. Pull pins allow the operator to set a perfect punch pattern format on the common sheet sizes. This feature reduces the set-up time by as much as 15 minutes and is unique for a fully automatic punch.

Manual Display

The AP 360 Manual display allows for quick and easy adjustment of the machine while in operation. Easily start and stop the machine, and control the speed and lift thickness by dials located on the control panel.
